

**MUNICIPALITY OF MACHIN
CONSENT APPLICATION**

NEW APPLICATION FEES

-Starting April 1999 the Municipality of Machin will charge fees to process certain planning applications.

The fees, permitted under recent amendments to the Planning Act, will apply to development applications such as plans of subdivision and condominium, consents, requests for official plan amendments not adopted by the municipality or planning board, Minister’s Zoning Order amendments, and Parkway Belt Land Use Regulation amendments.

WHERE WILL FEES APPLY?

- Fees will be charged on planning applications that are submitted to the Municipality of Machin under the Planning Act.

Municipality fees are comparable to those already charged by many municipalities.

WHAT FEES WILL BE CHARGED?

- The following fees will apply:

Consents (severance):	
<u>Each</u> new severed lot	\$550
Request for Official Plan Amendments under Section 22 were not adopted by the municipality or planning board:	\$1,800

Beginning April 1999 the required fee must accompany these planning applications. If a fee is not paid, the application may be returned.

HOW DO I PAY THE FEE?

- Payments should be made by certified cheque or money order, payable to the Municipality of Machin.

WHY ARE THESE FEES BEING CHARGED NOW?

- In many parts of the province, municipalities and planning boards now process these applications and charge a fee for doing so.

ANY QUESTIONS?

- If you have any questions, or if you want more information, call Tammy Rob, Machin Municipal office (807) 227-2633.

Applying for a Consent To Create a New Lot?

Tips that can help.

These tips are intended as a guide to help you decide if your proposed lot might qualify for a severance through the consent application process. There are other factors which may be considered in assessing your application for consent.

Is there an official plan for your area?

Official plans are local land use planning documents adopted by a local municipality or planning board and approved by the province. They reflect provincial and local planning issues and among other things, establish policies for lot creation.

Your proposed lot must conform to the requirements of the official plan, if any, and be consistent with the Comprehensive Set of Policy Statements (under section 3 of the **Planning Act**).

Is there a zoning order or zoning by-law for your area?

Local zoning by-laws or zoning orders may exist in your area. They set out specific requirements for new development (Eg. Minimum lot size, frontage, acceptable access etc.).

Your proposed new lot must conform to any zoning controls.

Your municipal Clerk, can help you interpret your local official plan and zoning by-law or zoning order.

Is consent the way to go?

Generally, the creation of new lots by consent may be considered where:

- only one or two are proposed;
- no more than two lots have been severed from the parcel since 1970, when approval of lot creations became mandatory;
- the new and remaining lot will have direct access to an existing publicly-owned and maintained road;
- extensions of municipal or communal sewer or water services are minor and can be done at no cost to your local municipality.

Where can new lots be created?

Generally, only limited development is permitted in rural areas. This helps protect the natural environment, the natural resources and the character of rural areas and also discourages the inefficient provision of services.

New lots created for permanent, year-round use should be located in existing, built-up areas.

If your area is not municipally organized, industrial or commercial lots can only be created on or

near a natural resource. For example, a small resort or campground next to a lake might be permitted. However, related uses, such as residential lots to house employees, would have to be located in nearby municipalities. ie. Septic you may want to contact the health unit prior to filling out your application.

All new lots must be suitable for their intended use. For example, new lots must be large enough to accommodate the proposed building and all servicing requirements.

Where can't new lots be created?

Generally, lots cannot be created on provincially significant wetlands, prime agricultural lands, lands containing mineral aggregate resources, hazardous lands such as steep slopes and areas susceptible to flooding or where fish or wildlife habitats will be disturbed.

In areas without municipal organization new permanent residential lots cannot be created where they are in close proximity to municipalities or settlement areas. Seasonal lots usually cannot be created in areas where there is potential for conversion to year-round use.

New lots cannot be created where they are not compatible with surrounding land uses. For example, a new lot for a house probably would not be permitted next door to a factory or a waste disposal site.

What kind of access do new lots need?

Any new lot must provide safe, long-term access for all vehicles, including service and emergency vehicles.

Generally, this means:

- lots should be located on publicly-owned roads which are maintained year round;
- a limited number of seasonal residential lots on private roads may be considered, on an in-fill basis, provided they won't be converted to permanent residential use and they have registered rights-of-way with direct access to a public road;
- water access may be acceptable for cottage lots if the lots are on an island or in a remote location, where future demand for road access is not anticipated; lots should be located within a reasonable distance to publicly-owned and maintain parking, docking and boat launching facilities.

What kind of services do new lots need?

In general:

- where municipal sewer and water services exist, lots should hook into that service;
- where municipal services cannot be provided, municipally-owned communal service are preferred;
- in other areas, a new lot must be acceptable for the installation of a septic tank and tile bed system and wells;
- lake water for cottage lots may be permitted, subject to the approval of the Ministry of the Environment and Energy.

What happens to my application after I submit it to the Municipality?

The Municipality is required to give notice of a complete application to persons and agencies that may have an interest in the proposed consent. This can occur in 2 ways: (1) by mail or personal service to all landowners and any condominium corporation within 60 meters of the subject land, or (2) by publishing a notice in a local newspaper.

Generally, the notice, circulation, site visit, if necessary, and a decision on a consent request will be done in 90 days from the receipt of complete application.

If the Municipality decides to approve the application, in most cases there will be conditions stipulated and these conditions must be fulfilled prior to granting the consent. The applicant has one year to full fill conditions, otherwise the application is deemed to be refused. The applicant, or any person or public body can appeal the decision and any or all of the conditions to the Ontario Municipal Board within 30 days of receiving the notice of decision.

If the Municipality proposes not to approve the application, the Municipality will send a notice, giving the reasons for the proposed refusal. The applicant, or any person or public body has up to 30 days from the notice to appeal the decision to the Ontario Municipal Board. If at the end of 30 days there is no appeal, the refusal decision becomes final.

The applicant can appeal the application to the Ontario Municipal Board of a decision has not been reached on the consent request with 90 days of the Minister's receipt of an application that contains all of the prescribed or mandatory information. Before filing a notice of appeal, the applicant should determine the status of the file since it might be possible for the Minister to make a decision on the application within a reasonable time. If all the needed information is submitted at the time of application, delays in processing the application can be avoided.

List of things the Sketch need to include:

- all Buildings, sheds, barns and dugouts
- location of all septic fields and wells
- any utilities (Waterline, Union Gas Lines)
- all Hydro poles
- Roadways and Laneways
- Waterways and Rivers
- Define the different areas (wooded area, lowland area)
- Measurements of each lot
- Lots to be severed and retained labeled on the sketch

Note to Applicants: In this form the term “subject” land means the land to be severed and the land to be retained.

Completeness of the Application

The information in this form that **must** be provided by the applicant is indicated by **black arrows** on the left side of the section numbers. This information is prescribed in the Schedule to Ontario Regulation 41/95 made under the Planning Act. The mandatory information must be provided with the appropriate fee. If the mandatory information and fee are not provided, the Municipality will return the application or refuse to further consider the application until the information and fee have been provided.

The application form also sets out another information that will assist the Municipality and others in their planning evaluation of the consent application. To ensure the quickest and most complete review, this information should be submitted at the time of application. In the absence of this information, it may not be possible to do a complete review within the legislated time frame for making a decision. As a result, the application may be refused.

Submission of the Application

- **One application form is required for each parcel to be severed.**
- The applicable fee as indicated by the Municipality’s Fee Schedule.
- 2 copies of the completed application form and 2 copies of the sketch are required by the Municipality. The copies will be used to consult with other ministries or agencies that may have an interest in the application. (Measurements are to be in metric units.)
